

Christopher Fergo

FRONT-END DEVELOPER

Employment History

Front-End Developer, WhereOWare, Remote

JANUARY 2023 — PRESENT

- Worked with Project Managers and Clients to maintain and add new features/functionality across a plethora of client websites
- Set up over ten different client websites locally using IIS and MS SQL Server to maintain and update when needed
- Utilized HTML5, CSS3 (SASS/LESS), & jQuery/Javascript via various frameworks like Bootstrap
- Utilized git and Agile workflows in .NET environments using EpiServer/Optimizely CMS
- Assisted client with new website build by creating reusable React TSX components in Storybook; then converted those React components into Razor syntax (C#, HTML) for use in Optimizely CMS

Front-End Web Developer, Verisk, Jersey City, NJ

SEPTEMBER 2020 — JANUARY 2023

- Worked in tandem with UX designers to develop FIGMA designs into reusable components across [Verisk](#) website
- Utilized HTML5, CSS3 (SASS/LESS), & jQuery/Javascript via Bootstrap framework
- Built and tested dynamic, reusable blocks using Atomic Design principles for web editors to use throughout our Optimizely CMS
- Updated NuGet packages in Episerver for Optimizely upgrade
- Ran Gulp using Node/NPM commands to compile SASS & LESS into CSS files
- Assisted in ASP.Net MVC (C#) development
- Assisted with bug-fixes, errors, and ADA issues using SiteImprove
- Provided users with permissions/credentials to gated content in Optimizely
- Maintained/updated JSON file of all Verisk locations
- Assisted with updating and maintaining Eloqua forms on website
- Implemented and tested cookie banners using OneTrust
- Created a complex [calculator](#) using JS to output savings based on user input
